CRUSH THE MYTHS:

5 MYTHS ABOUT REMOTE LEARNING

5 TIPS FOR MOVING TEACHING ONLINE

CREATING A SCREEN CAPTURE

So, what is a screen capture? Screen capture refers to our ability to take a picture or record the screen of the device we're using, most often a computer. A screen capture may be a still shot image, which captures part or all of your screen, and it can even be a video in which you're able to record your screen as you navigate and narrate. With some screen capture tools, like Snagit, you have the ability to edit your captures, allowing you to cut out unwanted parts, add call-outs, text and other effects.

Screen capturing is a great way to create instructional materials or tutorials. It allows you to add visual representations of what it is that you're explaining. You can use it to create flipped classes for instruction at any level of instruction. You can also use screen captures to deliver quality feedback to students or employees as well as many other ways.In addition to the professional uses, there are also many creative uses for screen capture.

Two other **FREE** screen capture tools are **Screencastify** and **Screencast-o-matic**.

Getting Started

1. Decide what you want to capture and create a script outline or talking points
2. Decide if you are capturing a webpage or a presentation. If so, practice navigating to your site/presentation and go through what you want to say; If you need to "chunk" the information to keep it 5 to 7 minutes..Do So!
3. Practice a few times and then record.
4. Save your video to either Vimeo or Youtube channel. (Here is a quick video on how to upload your video):

OPTION 1

Screencast-o-matic

- Cloud storage
- Save local, G-Drive, Vimeo or Youtube
- Trim and/or edit videos
- 15 minutes of recording time
- Unlimited number of videos
- Export the video in an MP4 format.
- Mobile Ready: iOS version- send the recorded video to desktop computer for editing.
- Basic subscription: Free
- Upgraded capabilities:$20 a year educator's price

LET'S PRACTICE

Record a welcome message to your students:
Listen to my sample

Create your own welcome video and submit HERE

Bonus Option: Check out loom.com
(not Zoom, Loom)

OPTION 2

Screencastify

- Stores directly to G-Drive
- Adds to Chrome
- 5 minutes of recording time
- Trim option only for video until purchased
- Save to Local drive, G-Drive or Youtube
- Highlight specific areas using your mouse.
- Drawing tools while recording.
- Basic subscription: Free
- Upgraded capabilities: $29 per year educator's price

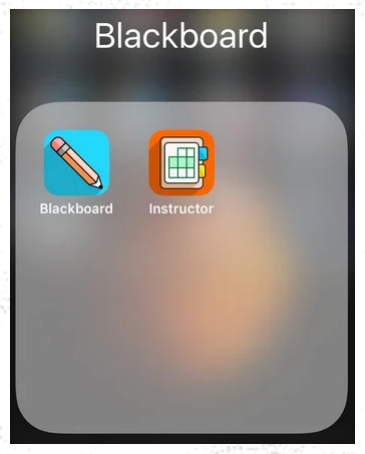
HOW TO DOWNLOAD THE BLACKBOARD APP FOR YOUR MOBILE DEVICE

Install app and log in



Use these steps to download and install the Blackboard app.

1. From your tablet or phone, access the appropriate app store.
   Download to your Apple® device
   Download to your Android™ device
2. If necessary, search for *Blackboard*.
3. Install the Blackboard app on your mobile device.
4. Open the Blackboard app and search for the full name of your school. If you're unable to find your school, try modifying your search. If your school is part of a larger institution or district, try searching for that name instead. If you still can't find your school, contact your school's IT help desk.
5. Log in with your Blackboard Learn username and password. These are typically the same credentials you use to access your Blackboard courses on a computer.

COFFEE WITH THE COACHES

WHEN

WEDNESDAY, MAY 13TH, 10-11AM
