PROGRAM FACT SHEET AUTOMOTIVE SYSTEMS TECHNOLOGY (A60160)

The Automotive Systems Technology program prepares individuals for employment as automotive service technicians. It provides an introduction to automotive careers and increases student awareness of the

challenge associated with this fast and ever-changing field.

Classroom and lab experiences integrate technical and academic course work. Emphasis is placed on theory, servicing and operation of brakes, electrical/electronic systems, engine performance, steering/suspension, automatic transmission/transaxles, engine repair, climate control, and manual drive trains.

After completion of this NATEF accredited curriculum, students should be prepared to take the ASE exam and be ready for full-time employment in dealerships and repair shops in the automotive service industry.

The Automotive Systems Technology Program prepares students for the ASE Certification. The ASE Certifications are valid nationwide. During the course of the program you will have the

opportunity to earn five certificates from Ford Motor Company that are valid nationwide.
