Purpose Statement

The purpose of Fayetteville Technical Community College is to provide affordable vocational-technical, business and industry, general education, college transfer, and continuing education programs, which meet the needs and desires of its diverse students and the economic development needs for the community, region, and state. To improve the educational attainment levels of society, FTCC encourages life-long learning and strives to prepare students for further workforce and educational experiences.

FTCC assesses the educational needs of applicants and assists students in satisfying these needs at a minimal expense. Each adult who applies will be admitted to a program of study appropriate to his/her abilities, interests, and goals. The College partners with the public-school system through High School Connections and other programs. Further, articulation agreements with four-year colleges and universities support the educational continuum from high school through the baccalaureate degree and beyond.

Curricular programs reflect the changing technical, commercial, industrial, and health needs of Fayetteville, Cumberland County, and surrounding areas. Various curricula offer certificates, diplomas, and associate degrees. As a learning- centered college, FTCC offers courses and programs at times and places convenient to students in a variety of delivery modes. Courses are also available for high school graduates who need additional academic preparation before attempting college work.

FTCC provides instruction in the basic life skills needed to become productive contributors in society. Continuing Education programs are designed to meet specific needs in basic educational competencies, high school completion, upskilling in a variety of occupations, and other avocational or practical skills required to meet employment requirements in a rapidly changing and technologically advanced economy.

North Carolina Military Business Center (NCMBC)

The North Carolina Military Business Center (NCMBC) is a statewide business development and technology transition entity of the State of North Carolina, headquartered at and supported by Fayetteville Technical Community College (FTCC). The mission of the NCMBC is to leverage military and other federal business opportunities to expand the economy, grow jobs and improve quality of life in North Carolina.

The NCMBC's **primary goal** is to increase federal revenues for businesses in North Carolina. The Department of Defense has an annual impact of $79.7 billion and is the second largest sector of North Carolina's economy (12.8% GDP). The State of North Carolina created the NCMBC to leverage opportunities with North Carolina military installations, DoD commands, and federal agencies operating worldwide. The NCMBC connects North Carolina firms to current government contracting opportunities in two ways – with a team of business development specialists across the state who also provide technical services, and electronically via www.MatchForce.org.

Business Development. The NCMBC's business development team includes experienced business development, industry and procurement specialists operating from 12 Community Colleges across the state – from Murphy to Elizabeth City. These specialists identify the most lucrative federal contract opportunities (prime and subcontracts), notify and pre-position North Carolina firms for specific opportunities, and assist firms to understand government solicitations, prepare winning proposals and to successfully execute federal contracts.

MatchForce. To connect North Carolina businesses with all federal opportunities, including local opportunities at bases in the state, the NCMBC administers the State's official, FREE web portal for federal contracting – www.MatchForce.org.

Strategic Initiatives. In addition to business development and MatchForce, the NCMBC conducts several strategic initiatives. These initiatives include:

- **Market intelligence** – identifying future business opportunities in key sectors
- **Pre-positioning and training** – for future and current opportunities
- **Current business development** – connecting businesses to contract opportunities
- **Solicitation and proposal support** – assisting businesses to compete and win contracts
- **Training and resources** – providing tools to overcome contracting obstacles
- **Events and networking** – focused on target sectors including statewide summits for the medical, aerospace, cybersecurity, military construction and textile, and soldier systems industries

DEFTECH. The NCMBC also established the North Carolina Defense Technology Transition Office (DEFTECH) to enable North Carolina's innovation ecosystem to address complex national security problems, and increase economic opportunities for businesses in the state.

Other goals. The NCMBC also conducts employment programs to support the integration of highly skilled, transitioning military personnel, family members, and veterans into the state workforce. The NCMBC maintains a searchable, historical database of transitioning military personnel to inform workforce potential and economic development needs in North Carolina.

The History of Fayetteville Technical Community College

FTCC enjoys a rich history that began as a result of a vision shared by concerned business leaders in Cumberland County who recognized the need for a local institution to provide job training for area industries and educational opportunities for high school graduates and adult learners. From that vision and through the perseverance of those leaders, the Fayetteville Area Industrial Education Center (IEC) was established in 1961. In 1963, the North Carolina General Assembly passed a bill creating the statewide Community College System, and from this opportunity in that same year, the Fayetteville Area Industrial Education Center became known as Fayetteville Technical Institute (FTI). In January 1988, the name of the college changed to Fayetteville Technical Community College to broaden and enhance the public image of technical and vocational postsecondary education.

FTCC has enjoyed much success and celebrated its 60th anniversary in 2021 under the leadership of its former President, Dr. J. Larry Keen. From its humble beginnings with two buildings (Lafayette Hall and Horace Sisk) to its current 130-acre Fayetteville campus plus outlying educational centers, FTCC has grown not only in numbers of buildings and acreage but also in student enrollment. In addition to the central Fayetteville campus, FTCC offers students the option of programs offered at the Spring Lake campus (2004), the Fort Bragg Center (which offers convenient access to classes for military students) (1974), the Horticulture Educational Center (2006), the Collision Repair and Refinishing Technology Center (2015) and the General Classroom Building was completed in 2012 to allow expansion of student support services. The General Classroom Building is also home to the All-American Veterans Center established in 2014. FTCC is a proud partner with the North Carolina Military Business Center, whose headquarters is housed at the Fayetteville campus. In 2017, FTCC opened the Law Enforcement and Emergency Management Center located in Spring Lake. With the expansion of athletics programs at Fayetteville Tech, the College acquired the J. P. Riddle Stadium in December 2018 through gifting by the Cumberland County Board of Commissioners.

A program with Caliber Collision, Changing Lanes, held its first graduation in 2017 through Transition Tech, a program to help soldiers transitioning from military service to civilian life. The Changing Lanes program, located at the Transportation Technology

Facility (2019) is the first in the country to provide active duty service members with training and employment opportunities in the collision repair industry prior to their transition from the military. In July 2018, FTCC celebrated the first graduating class from the Commercial Driver's License (CDL) Truck Driver Training Program, part of the College's Transition Tech program, with 90 percent of graduates in jobs.

In 2017, FTCC established the FTCC Educational Center in downtown Fayetteville (225 B Street) where Adult Basic Education and other Corporate and Continuing Education programs and classes are held. FTCC also established the Center for Innovation and Entrepreneurship inside the General Classroom Building, assisting entrepreneurs and small business owners. The Horticulture Educational Center was re-named as the Wesley A. Meredith Horticulture Educational Center. Meredith, an avid supporter of North Carolina's community colleges, is a FTCC graduate of the Horticulture Technology program who succeeded in becoming an entrepreneur in addition to representing North Carolina's 19th Cumberland County District as Senator.

VIQTORY® Media recognizes FTCC's service to military members, veterans, and military families and designated FTCC as a Military Friendly School, Top Ten Gold Category, and as a Top Ten Military Friendly Spouse School for 2024-25. VIQTORY® Media also recognized FTCC as a Science, Technology, Engineering, and Math (STEM) approved college. Sustainable Sandhills of North Carolina recognized FTCC as the first local college to be certified as "green" for sustainability. For several years, FTCC has ranked high nationally by Military Times for Best for Vets: Career & Technical Colleges. FTCC is recognized as a top school for best practices in military and veteran education by Military Advanced Education's (MAE) Guide to Colleges and Universities. FTCC is a designated as a National Center of Excellence in Cybersecurity Education by the National Security Agency and Department of Homeland Security.

During 2023-2024, FTCC served 29,986 students through its various Curriculum and Corporate & Continuing Education opportunities. What began as a vision over sixty years ago, evolved into exactly what business leaders envisioned in 1961. Through the school's vision of transforming lives through lifelong learning, FTCC's workforce and industrial programs produce attractive returns on investment and improve individual's economic and social mobility.

History of the North Carolina Community College System

In the years following World War II, North Carolina began a rapid shift from an agricultural to an industrial economy. With that change came an awareness that a different kind of education was needed in the state. People who did not desire a four-year baccalaureate education nevertheless had the need for more than a high school diploma.

In 1950, the State Superintendent of Public Instruction authorized a study of the need for a system of tax-supported community colleges. The resulting report, by Dr. Allan S. Hurlburt, was published in 1952. It proposed a plan for development of state supported community colleges. In 1957, the General Assembly adopted the first Community College Act and provided funding for community colleges.

The same (1957) General Assembly also provided funding to initiate a statewide system of Industrial Education Centers. These centers were to train adults and selected high school students in skills needed by industry. By 1961, there were five public junior colleges emphasizing arts and sciences, and seven industrial education centers focusing on technical and vocational education.

The need to coordinate these two post-high school education systems led Governor Terry Sanford to appoint the Governor's Commission on Education Beyond the High School (Irving Carlyle, chair). In 1962, this commission recommended that the two types of institutions be brought into one administrative organization under the State Board of Education and local boards of trustees. The resulting unified community college system would provide comprehensive post-high school education. One of the system's most important early advocates was Dr. Dallas Herring of Rose Hill, then chair of the State Board of Education.

In May 1963, the General Assembly, in line with the Carlyle Commission report, enacted into law G.S. 115A (later changed to 115D), which provided for the establishment of a Department of Community Colleges under the State Board of Education and for the administration of institutions in the Community College System. There were then 20 industrial education centers, six community colleges (three of which became four-year schools in 1963), and five extension units.

By 1966, there were 43 institutions with 28,250 full-time equivalent (FTE) enrollments. In 1969, there were 54 institutions with 59,329 FTE. The system had grown very rapidly, exceeding ten percent annually nearly every year until the late 1970s. In 1974-75, growth reached the 33 percent mark. The system continues to grow in enrollments nearly every year, but by much more modest margins. The number of colleges has not increased since Brunswick Community College became the 58th in 1978. In 1991, the North Carolina Center for Applied Textile Technology became subject to the management of the North Carolina State Board of Community Colleges. In July 2005, Gaston College, part of the North Carolina Community College System, absorbed the textile center.

The original legislation placed the community college system under the purview of the State Board of Education, and created a State Department of Community Colleges. In the early years of the system, the State Board of Education Chair was Dallas Herring; David Bruton succeeded him in 1977.

In 1979, the General Assembly changed the state control of the system with a provision for a separate State Board of Community Colleges. The Board was appointed and organized in 1980, and met several times with the State Board of Education. The new Board assumed full responsibility for the system on January 1, 1981. The Board's first chairperson was Duke Power Company Executive Carl Horn. He was succeeded in 1983 by John A. Forlines, president of Bank of Granite and then by William F. Simpson in 1989. Lt. Governor Dennis A. Wicker served as chair from 1993 until 1999. Dr. G. Herman Porter, former president of Wayne Community College, served from 1999 until 2001. Businessman James J. Woody, Jr. of Roxboro served from 2001 until July 2005. Progress Energy executive Hilda Pinnix-Ragland served four terms from 2005-2013. She was succeeded as chair by Dr. Linwood Powell of Fayetteville, who served from 2013-2015. Scott Shook, Vice President at Truist Investment Services, served two terms from 2015-2019. Dr. Breeden Blackwell, a retired school principal from Fayetteville, served from 2019-2021. The current chair is Mr. Burr Sullivan of Lexington.

The North Carolina Community College System has had eleven presidents: Mr. I. E. Ready (1963-1970), Dr. Ben E. Fountain, Jr. (1971-1978), Dr. Larry J. Blake (1979-1982), Mr. Robert W. Scott (1983-1995), Dr. Lloyd V. Hackley (1995-1997), Mr. Martin Lancaster (1997-2008), Dr. R. Scott Ralls (2008-2015), Dr. James C. (Jimmie) Williamson (2016-2017), Mr. Peter Hans (2018-2020), Mr. Thomas Stith, III (2021-2022), and **Dr. Jeff Cox (2023-Present)**. Mr. Charles R. Holloman served as acting president

(1978-1979); Mr. George Fouts served as interim president (2015-2016); Ms. Jennifer Haygood served as acting president (2017-2018); and Dr. William Carver served as interim president (2020-2021, 2022-2023).
