

INFORMATION LITERACY

Students will demonstrate the ability to use technology to find, evaluate, synthesize, and communicate information.

Students will:

- 1) **Define the scope** of the problem to understand the precise issue the project will address.
- 2) Navigate a discipline-appropriate technological system to **find appropriate information** relevant to a purpose.
- 3) Address the problem by **synthesizing information** that has been collected.
- 4) **Communicate** a clear rationale for a targeted audience utilizing the appropriate digital format.
