## PROGRAM FACT SHEET GENERAL MAINTENANCE CERTIFICATE (C35140C4)

This evening program is designed to train individuals in the area of general maintenance including the following areas:

**BASIC CONSTRUCTION** - This area includes hands-on experience in construction involving the building of platforms and stairs, sheetrock replacement and repair, countertops, building and moving of framed walls, and interior trim.

**PLUMBING** - Course work includes hands-on experience in plumbing involving troubleshooting, replacement of plumbing fixtures, valves and stems, and repairing drainage problems.

**ELECTRICAL** - Students will gain hands-on experience involving troubleshooting and installation of electrical circuits, replacement of old and new electrical equipment, and installation of receptacles, switches, lights, and ceiling fans.

**AIR CONDITIONING/HEATING/REFRIGERATION** - Course work includes hands-on experience involving troubleshooting of HVAC equipment and minor repair, replacement of thermostats, and certification in refrigeration.

Along with the course work involving the trades mentioned above, individuals within the program will also be trained in Construction Safety.

Individuals completing the program may receive opportunities in the professions of commercial and residential maintenance including but not limited to apartment complexes, motel/hotel chains, hospitals, schools, and other places of business where maintenance is often required.

Upon completion of the General Maintenance Certificate, students may be interested in pursuing an Associates Degree in Building Construction A35140.

The Building Construction curriculum is designed to prepare individuals to apply technical knowledge and skills to the fields of architecture, construction, construction management, and other associated professions.

Course work includes instruction in sustainable building and design, print reading, building codes, estimating, construction materials and methods, and other topics related to design and construction occupations.

Graduates should qualify for entry-level jobs in architectural, engineering, construction and trades professions as well as positions in industry and government.

**Building Construction Technology:** A program that prepares individuals to apply technical knowledge and skills to residential and commercial building construction and remodeling. Includes instruction in construction equipment and safety; site preparation and layout; construction estimating; print reading; building codes; framing; masonry; heating, ventilation, and air conditioning; electrical and mechanical systems; interior and exterior finishing; and plumbing.
