PROGRAM FACT SHEET INFORMATION TECHNOLOGY/ DATABASE MANAGEMENT (A25590B)

The Information Technology (IT) curriculum prepares graduates for employment in the technology sector as designers, testers, support technicians, system administrators, developers, or programmers who use

computer software and/or hardware to design, process, implement, and manage information systems in specialties such as database services, security, business intelligence, healthcare informatics and others depending on the technical path selected within this curriculum.

Course work includes development of a student's ability to create, store, communicate, exchange and use information to solve technical issues related to information support and services, interactive media, network systems, programming and software development, information security and other emerging technologies based on the selected area of study.

Graduates should qualify for employment in entry-level positions with businesses, educational systems, and governmental agencies which rely on computer systems to design and manage information. The program will incorporate the competencies of industry-recognized certification exams.

OUTCOME STATEMENT

A graduate of the Database Administration program at FTCC understands the components of how information support systems and services work. He or she can create, store, communicate, exchange, and use information to solve technical issues related to database administration. Graduates are prepared for entry level work in the database administration field providing support to database administrators.

Program Outcomes

1. Understand the role of databases and database management systems within the field of information technology.
2. Demonstrate knowledge of SQL data definition and SQL.
3. Develop queries to extract information from large datasets.
4. Implement a database solution in the area of information technology.
