

HAYNES

International

Now Hiring 2nd & 3rd Shift Machine Operators & Material Handlers

We are located at 158 N. Egerton Road Hendersonville, NC 28758

What we offer:

- A dedicated wire drawing company with remarkable employee retention and management stability
- 12 paid Holidays including a full week off over the Christmas Holidays
- Machine Operator starting wage is \$18.25-\$19.25. Pay increases are at 3 months, 12 months and yearly
- Low cost health, dental and vision insurance. Benefits start on the employee's 61st day. Short Term Disability and Life Insurance are 100% Company paid
- Company matching 401K
- Consistently achieve the SHARP safety recognition award from OSHA through on-going equipment updates and accountability to ensure proper PPE is used

What we do:

Haynes Wire is the wire draw facility of Haynes International (HI). HI is one of the world's largest developers of high-performance nickel and cobalt based alloys. Drawing weld wire from these alloys is the cornerstone of our operations. It's what has earned us a reputation as a world-class manufacturer. What exactly does wiredrawing mean? It involves the careful process of passing wire through a series of holes (or dies) in a machine to make it thinner.

What we expect of you:

- A desire to learn and get better each day
- At least one-year experience within a manufacturing facility.
- Frequent walking, bending, twisting, and lifting.
- Ability to lift up to 50 lbs.
- Attention to detail and ability to check your own work for accuracy.
- Basic computer knowledge
- Be able to understand basic English. Ability to speak fluent English is not necessary.

You will be responsible for setting up the machine, stringing the wire onto the machine, operating it, inspecting the wire, and clean-up. You will adjust parts on the machine and operate tools.

Operators keep a close eye (detail and accuracy come in handy) on their machines to make sure everything is running as it should. It's about achieving the highest wire quality and meeting customer specifications.

While there's certainly plenty of physical work that comes with drawing wire, the mental aspect of the job is just as important. Reading and understanding production orders, along with proper documentation, is needed to ensure the utmost accuracy. Problems with the wire or machine may occur, so you need to be able to work with and communicate with others to solve problems.

Options to Apply:

Apply on-line through ncworks.gov / job number 11736062 or, **e-mail** your resume to: Cthompson@haynesintl.com

Applicants are also welcome to come in and complete an application from 9am-4pm M-F

158 N. Egerton Road Hendersonville, NC 28758
