

933 Robeson St, Fayetteville

## **FABRICATION SPECIALIST**

**Position Overview:** As a Fabrication Specialist, you will play a key role in the assembly and fabrication of custom stainless-steel tables, cabinets, sneeze guards, and other food service equipment components. Your expertise in fitting, welding, and ensuring adherence to customer-approved shop drawings will be crucial in delivering high-quality, precision-crafted products.

### **Key Responsibilities:**

- **Assembly & Fabrication:** Assemble and fabricate custom stainless-steel tables, cabinets, sneeze guards, and other food service equipment components according to specifications.
- **Fitting & Welding:** Fit and weld various stainless-steel parts to ensure structural integrity and alignment. Utilize TIG welding techniques as required.
- **Shop Drawings Compliance:** Review and interpret customer-approved shop drawings to ensure all fabricated pieces meet design specifications and quality standards.
- **Quality Control:** Conduct thorough inspections of completed work to ensure accuracy, durability, and adherence to project requirements. Make adjustments as necessary.
- **Tool & Equipment Maintenance:** Operate and maintain fabrication tools and equipment, including but not limited to welding machines, grinders, and cutting tools.
- **Safety:** Adhere to all safety protocols and guidelines to maintain a safe working environment. Report any hazards or safety concerns immediately.
- **Collaboration:** Work closely with other team members, including designers and project managers, to ensure timely and accurate project completion.

### **Minimum Qualifications:**

- **Experience:** Minimum of 5 years' experience in stainless steel fabrication, including welding and assembly of custom food service equipment.

- **Licensing:** Must have an active Driver's License with good driving record.
- **Certifications:** NSF and OSHA 30 certifications preferred. (If not currently certified, we will assist with certification.)
- **Technical Skills:** Proficient in reading and interpreting shop drawings and blueprints. Strong knowledge of welding techniques (TIG) and fabrication tools.
- **Attention to Detail:** Exceptional attention to detail with a focus on precision and quality in every aspect of the fabrication process.
- **Problem-Solving:** Ability to troubleshoot and resolve issues that arise during the fabrication process.
- **Physical Requirements:** Ability to lift and maneuver heavy materials and work in various physical conditions, including standing for long periods.
- **Education:** High school diploma or equivalent required. Relevant technical training or certification in welding and fabrication is a plus.
