Fayetteville Technical Community College

MILITARY & VETERANS PROGRAMS

MVP SPOTLIGHT

The success of our programs is built on the incredible collaboration between students, staff, and the Military & Veterans Programs team. Every day, I have the privilege of working alongside dedicated individuals who are committed to helping military-affiliated students transition into their academic and professional journeys. From assisting with course registration to providing tutoring for computer science classes, I have seen firsthand how a strong support system can empower students to succeed. The teamwork and shared commitment to student success create an environment where everyone is encouraged to reach their full potential.

One of the most rewarding aspects of my role is mentoring and advising students as they navigate their paths in technology after the military. Many students come in with a wealth of experience from their military service but need guidance on how to translate those skills into a civilian career. By working closely with the Military & Veterans Programs staff, I help connect students with the right resources, academic plans, and career opportunities. Seeing their growth, confidence, and eventual success in the tech industry is what makes this work so fulfilling. It is truly an honor to be part of a team that is dedicated to supporting those who have served, ensuring they have the tools and guidance needed to thrive in their next chapter.
